The **PIPE**

# Viper™

MAKES BENDING PVC CONDUIT

## Strikingly Simple

Ready to spring into action, the Pipe Viper is a perfect tool for electricians and datacom technicians. Uniquely engineered from heavy gauge spring steel, its design permits it to bend in multiple directions, allowing the re-shaping of PVC conduit up to 4" in diameter.

- Eliminates the need for heat guns and heat blankets
- Allows installers to permanently bend conduit up to 90° without pipe collapse
- Rugged, light-weight and easy-to-use
- Available in nine diameters:
  - 1/2 inch
  - 3/4 inch
  - 1 inch
  - 1 1/4 inch
  - 1 1/2 inch
  - 2 inch
  - 2 1/2 inch
  - 3 inch
  - 4 inch

*Insert the Pipe Viper into the PVC. For smaller diameters, simply bend over your knee. Larger diameters will require a pipe bender. A quick twist of the Viper and it is easily removed from the pipe.*
